

Gottstein Trust

Opportunity | Knowledge | Innovation

THE GOTTSTEIN LEGACY

The Joseph William Gottstein Memorial Trust Fund, established in 1971, provides a lasting memorial for the eminent Australian forest scientist Bill Gottstein. He worked with CSIRO and tragically lost his life in an accident in a forest in PNG.

This national education trust provides opportunities for individuals from Australia to further their learning. It is focussed on people involved in growing and using timber. These learning experiences supported by the Gottstein Trust help to advance Australia's forest products industry. The Trust encourages the pursuit of excellence through people, improving processes and improving products.

Organisations and individuals within the industry generously support the Trust to achieve its goals, by making donations or giving in-kind support. Two industry educational courses are run by the Trust (see below). The surplus funds generated from the courses are added to the Fund. These vitally important fund-raising activities ensure that grants for Fellowships, Scholarships and Industry Awards can be made every year.

The Flagship Gottstein Educational Activities

- **Gottstein Fellowship** – a grant which usually covers an overseas study tour to investigate a specific topic and bring back new ideas, learnings and insights.
- **Gottstein Scholarship** – a grant for undergraduates or postgraduate students who are undertaking either a bachelor's degree, graduate diploma, master's degree or PhD in a forest science or wood science field.
- **Gottstein Industry Award** – a grant for applicants at any level, to help them improve their professional skills and advance their career prospects.
- **Gottstein Understanding Wood Science/Understanding Forest Science Courses.** Two "crash courses" for non-experts in each field. One type of course is run each year.

Please support the Gottstein Trust as a 2019 Patron

GOTTSTEIN TRUST GRANTS AWARDED IN 2018

2019 Fellowships

David Bennett

Topic: A review of contractor certification systems. David works with PF Olsen, Traralgon.

Dr. William (Will) Woodgate

Topic: Solar induced Fluorescence (SIF): assessing a new means to measure forest productivity over large areas. Will works with CSIRO, Canberra.

Harry Mills

Topic: The Potential for Under-utilised Timber in the Built Environment. Harry is a PhD student at University of Queensland.

Dr. Fred Moshiri

Topic: Design and Construction of Mid-rise Light Timber Framed Buildings Utilising Prefabricated Frames. Fred works with ACOR Consultants, Sydney.

2019 Scholarships

Rose Brinkoff

PhD at University of Tasmania

Research: The costs and benefits to plantation production of an increase in tree Leaf Area Index.

Travis Britton

PhD at University of Tasmania

Research: Local-scale drivers of tree growth in an early-stage forest plantation

Thank you 2018 donors

Special Donation \$10,000

EXPRESSION OF INTEREST

GOTTSTEIN TRUST PATRON 2019

Name _____

Organisation _____

Contact: Email _____

Phone _____

We wish to express interest in **becoming a Patron/continuing as a Patron** to support the valuable work of the Gottstein Trust to benefit the industry.

We wish to contribute. Please send an invoice for the amount of \$2,000

OR

We would like to discuss our potential participation. Please make contact with me or my colleague _____ (*insert name*)

There are also opportunities for small businesses and individuals as **Supporters** of the Trust by contributing \$500 – \$1,000.

Patrons receive a 20% discount on the Gottstein Trust Forestry and Wood Science Courses. Subscribers of \$1,000 receive a 10% discount.
(*Course Discounts apply for 2 attendees per course per organisation in any one year.*)

Please email form back to the Gottstein Management Team:
gottsteinsecretary@gmail.com
